3 Very Smart, Cost-Cutting Reasons To Upgrade Your Peer-To-Peer Network To A Microsoft 2008 Small Business Server!

If you've got a business with 5 or more employees in the office, there are some very compelling reasons you might want to consider upgrading to Microsoft's 2008 Small Business Server:

#1. Instant Remote Access, From Home Or On The Road

Want to work from home as if you are sitting in the office? A Microsoft Small Business server can enable you to do this. Some companies are actually allowing employees to work remotely to save on office space. One client of ours got rid of their expensive office space and has all their employees working from home. This saved them a tremendous amount of money on rent and related expenses, and their employees are happier and more productive to boot.

#2 Tighter Security Against Hackers And Viruses

Having a server provides a central point of access that can be more effectively defended against hackers and viruses. Since all the PCs on the network connect through that central portal, it's easier to keep anti-virus updates current and security systems in place. You'll also be able to manage and monitor employees' Internet access, block spammers, and automatically remove dangerous e-mail attachments to help prevent virus attacks.

#3 More Complete And Reliable Backups

A server will consolidate all the data residing on your and your employees' desktops and enable you to back everything up at once. Often companies have over half of their critical data and documents residing on individual PCs. If one of those PCs gets compromised, corrupt or experiences a major hardware failure, you could easily lose all of that data!

Have us upgrade your peer-to-peer network to a Microsoft Windows based 2008 Small Business Server during the month of August and you'll get 3 FREE months of our Platinum Intelligent IT Service, that's a \$3,000 savings.

FREE RADIO Advertising!

Have we helped you or gotten you out of a jam, been there when no one else could solve the problem, gone above and beyond the call of duty?

If so, why not tell the world in one of our 95.9 WATD radio ads. We're looking for new voices - all you have to do is plug your business, describe your problem and how we fixed it.

It's 70% you, 30% us.

Call Pam at 781-834-9208 Ext 202 and tell her your story. We'll pick 2 businesses each month to share the WATD spotlight with us. We'll even put the ads up on our websites!

You can email Pam@GoAmerican.com if you'd prefer.

We're looking forward to hearing YOU on the radio!

This contest is open to all ACTSmart, Inc clients. Subject to availability and to change without notice.

We're ALWAYS here for you!

Do You HATE Having To Remember All The Passwords For Your Computer And Various Web Sites You Visit?

If you are like most people, you have a hard time remembering all of the

passwords you have to use for various web sites and vendors. Problem is, choosing easy to remember passwords won't thwart the "bad guys." Writing them down is not recommended, and using Microsoft applications to remember your passwords is like walking through a crowd with hundred dollar bills hanging from your pockets.

If you'd like an easy way to not only keep track of all the passwords you use, but also make filling in online forms faster and easier, then I recommend a software product called RoboForm. This inexpensive program completely automates password entering and form filling. The software...

- Memorizes your passwords and logs you in automatically.
- Fills in long registration and checkout forms with one click.
- Encrypts your passwords to achieve complete security.
- Generates random passwords that hackers cannot guess.
- Fights phishing by filling in passwords only on matching web sites.
- Defeats keyloggers by not using the keyboard to type passwords.
- Backs up your passwords and copies them between computers.
- Portable: RoboForm2Go runs from a USB key; no install needed.
- Neutral: works with Internet Explorer, AOL/MSN, Firefox.

To download a free 30-day trial of RoboForm, go to this page on our web site: www.goamerican.com/roboform

Now You Can Pay Your Invoices ONLINE

In an effort to save TIME and MONEY, you can now Safely and Securely make payments for your invoices on our website - ACTSmart, Inc American Computer Technologies has partnered with Authorize.Net, a leading payment gateway since 1996, to offer safe and secure credit card transactions for our customers. When you want to pay a bill with us simply go to

<http://goamerican.com/payments>

After you've entered and confirmed the amount to pay, your invoice number and a brief description you'll be taken to our Secure Payment Page to enter your credit card information. Safe and Secure - you'll be finished in seconds. No more stamps or trips to the Post Office....

New Processes & New Programs = BETTER SERVICE!

As we continue integrating with Tigerpaw, our new practice management application, we're making some terrific changes in how we handle service requests and updates from all of our clients.

As many of you have noticed, over the past 18 months or so, our entire team has been including our "support contact" information in the body of our email signatures.

support@goamerican.com is the email address to use for ALL support requests.

By using this address to submit your requests, our system will automatically create a service order from the email request submitted, generate a tracking number, create workflow and alerts for our team and send you a confirmation that your request has been received and is being taken care of. All this information is saved directly into your account for future reference and follow-up.

This process provides us with additional checkpoints, follow-up and confirmations - allowing us to greatly improve upon the exceptional service you've come to expect from ACTSmart.

For this to be most effective, all you need to do is send your requests to support@goamerican.com as shown above. The subject line should contain a brief description of what you are requesting – ie: website update, computer problem, help with email or any other descriptive information to help direct the request to the proper department. Then type your detailed request in the body of the email.

What could be easier?

Our Free Disaster Recovery Audit Reveals How FAST Your Business Could Be Back Up and Running After A Natural Disaster, Server Crash, Virus Attack, Or Other Catastrophe

DON'T GET CAUGHT UNPREPARED !

We want to give all our clients and friends a FREE Disaster Recovery Audit to help answer critical questions such as:

- How fast could you recover after a data-erasing disaster?
- What would happen if you HAD to restore all of your data tomorrow? What steps would be involved, what would it cost and how long would it take?
- Is ALL your data being backed up, every day in a format that is actually usable?
- Are you REALLY protected from hackers, viruses, and simple human error?
- Do you really know the steps and costs to rebuild your servers and recover your data?

There's absolutely **no cost or obligation** when you say "YES!" to my free offer. If we find a problem, we'll let you know right away what you can do to resolve it. If we don't find any problems with your current backup system, you'll at least gain the peace of mind knowing your data IS safe!

Client Of The Month

Last year, we had a major network server issue. The server required several hours to make operational again. ACT dropped everything because they knew that our business was at a stand-still and we needed help. There are very few businesses that are so customer-focused and can react to their customer's needs so quickly and in such a dedicated way.

We truly appreciate their reliable business support and professional expertise. Despite the fact that our business environment is harsh and abusive to computers, my business has experienced next to zero percent downtime. When we have the occasional computer or network issue, we know, without question, that ACT will be onsite immediately (or remotely) to resolve our problems.

We are in the business of fixing cars, not fixing computers and are forever grateful for our ongoing relationship with ACT as it allows us to focus on our customer's needs... not our business' IT concerns.

The entire ACT team is well trained and a pleasure to do business with. We are always satisfied with computer problems that "go-away" fast. Your "remote support" solution is also very impressive. ACT has been able to monitor the status of our network server and back-up systems 24/7. This gives me a "peace-of-mind" comfort level that is much appreciated as a business owner.
